Document Confidentiality Statement	2
Document History	3
1 Objective	5
2 Reporting Principles	5
3 Types of reports in the system	5
3.1 Store Orders Export (Line-level) Report	5
3.2 Shipments & Tracking Export Report	6
3.3 Issues & Reorders Export Report	6
3.4 Ops Dashboard Metrics (Weekly) Report	7
3.5 Campaign Summary Report	7
3.6 Execution & Proof Export (Line-level) Report	8
3.7 Verification & Retakes Export Report	9
3.8 Survey Response Export Report	9
3.9 Exception Queue Export Report	10
3.10 Review Queue Export Report	11
3.11 Issue Reporting	11

1 OBJECTIVE

The objective of reporting is to provide **role-specific visibility, tracking, and decision support** across campaign fulfillment, execution, verification, and exception management.

Reports are intended to:

- Enable operational execution and SLA tracking.
- Provide campaign-level oversight to Brands.
- Support proactive exception handling by Regional teams.
- Maintain auditability for issues, reorders, and proof verification.

2 REPORTING PRINCIPLES

- Reports are **persona-driven**, not data-driven
- Focus on **operational and business questions**, not raw data
- Line-level detail is provided only where actionability is required
- Dashboards provide **aggregated insights**, and exports provide **traceability**
- Store users interact with reporting only through **task-driven workflows**

3 TYPES OF REPORTS IN THE SYSTEM

All reports can be exported in **CSV or Excel** format for offline analysis and review. Dashboards provide aggregated insights, while exports ensure traceability and support detailed review.

3.1 Store Orders Export (Line-level) Report

Role: PSP Admin / PSP Ops

Purpose:

This report serves as the primary operational document for PSP Admin and PSP Operations teams to manage, process, and track store orders received for campaign fulfillment. It enables PSP users to view every order at an item (line) level, acknowledge orders in their Management Information System (MIS), and efficiently execute fulfillment activities.

Description:

- Provides a **line-level breakdown of store orders** received by the PSP, where each row represents a single item within an order.
- Helps PSP Admin/Ops teams **identify which stores and campaigns the orders belong to** using campaign and store identifiers.
- Includes the **PSP MIS order reference** to support internal order processing and reconciliation.

- Captures **order acknowledgement timestamp**, allowing teams to track when the PSP accepted orders.
- Displays **item IDs and quantities** required for picking, packing, and dispatch operations.
- Shows the **current order status** to monitor progress and quickly identify pending, in-progress, or completed orders.
- Acts as the **single source of truth for daily fulfillment operations**, exception handling, and operational reporting.

Columns included in the report:

Campaign Name, Store Name, Store Number, Store Alias, Item Name, Quantity, PSP Order Reference, PSP Acknowledged On, Order Line Number, Order Status

3.2 Shipments & Tracking Export Report

Role: PSP Admin / PSP Ops

Purpose:

This report enables **PSP Admin and PSP Operations teams** to track and manage the **shipping and delivery status of store orders**. It provides end-to-end visibility of shipments, enabling PSP users to monitor dispatch, delivery progress, and the completion of fulfillment activities.

Description:

- Provides a **shipment-level view** of orders dispatched to stores
- Allows PSP teams to **track shipments using carrier tracking numbers**
- Displays **shipping and delivery dates** to monitor transit timelines and confirm successful delivery
- Shows the **current shipment status** (Pending, Shipped, Delivered) for operational tracking
- Identifies **partial shipments**, helping teams manage split deliveries and outstanding items
- Supports **issue resolution, delivery confirmation, and operational reporting** for fulfillment operations

Columns included in the report:

Shipment Number, Store Name, Store Number, Tracking Number, Carrier Name, Shipped On, Delivered On, Shipment Status, Partial Shipment

3.3 Issues & Reorders Export Report

Role: PSP Admin / PSP Ops

Purpose:

This report enables PSP Admin and PSP Operations teams to track, manage, and resolve **issues reported by stores** during kit receipt, such as missing, damaged, or incorrect items. It also provides visibility into **approved reorders, replacements, and substitutions**, ensuring complete issue closure and fulfillment accuracy.

Description:

- Provides a **centralized view of all issue requests raised by stores** against delivered orders.
- Captures **item-level issue details**, including affected items and quantities.
- Identifies the **reason for the issue** (missing, damaged, or incorrect items).
- Includes **photo evidence references** submitted by stores to support issue validation.
- Tracks the **approval workflow**, from issue creation through triage and final approval or rejection.
- Shows **who approved the issue and when the decision was made**.
- Links approved issues to **reorders or replacement shipments**, if applicable.
- Supports **operational monitoring, auditability, and closure tracking** for all store-reported issues.

Columns included in the report:

Issue Number, Store Name, Store Number, Item Name, Issue Type, Affected Quantity, Approval Status, Approved By, Decision Date, Reorder Number, Replacement Shipment Number, Substituted Item.

3.4 Ops Dashboard Metrics (Weekly) Report

Role: PSP Admin / PSP Ops

Purpose:

This report provides PSP Admin and PSP Operations teams with a **weekly operational snapshot of fulfillment performance**. It helps leadership and operations teams monitor service levels, identify bottlenecks, and take corrective actions to ensure timely and efficient order fulfillment.

Description:

- Presents **high-level weekly metrics** summarizing fulfillment operations.
- Highlights **orders that missed the ship-by date**, enabling teams to address delays.
- Tracks **backlog of unfulfilled orders** to support capacity planning and prioritization.
- Monitors **reorder volume** to identify recurring issues and fulfillment gaps.
- Measures **SLA compliance**, helping assess overall operational efficiency and performance.
- Supports **data-driven decision-making, performance reviews, and operational planning**.

Columns included in the report:

Late Shipments, Orders Pending Fulfillment, Reorder Requests Raised, SLA Compliance Percentage.

3.5 Campaign Summary Report

Role: Brand Admin / Campaign Manager

Purpose:

This report serves as the **primary roll-up report for Brand Admins and Campaign Managers** to monitor the overall health, progress, and performance of campaigns. It provides a consolidated view of campaign timelines, store participation, fulfillment status, and key operational metrics required for effective campaign oversight and decision-making.

Description:

- Provides a **high-level overview of each campaign**, including its type, timelines, and governing policies.
- Displays **key campaign milestones** such as ship-by, install-by, and end dates to track schedule adherence.
- Shows **verification and approval configurations**, including review mode and SLA timelines.
- Summarizes **store participation and completion status** to measure the progress of campaign rollout.
- Highlights **exceptions and risks**, such as late shipments, anomalies, reorders, and rejected photos.
- Enables Brand and Campaign Admins to **identify bottlenecks, take corrective actions, and ensure campaign success**.
- Acts as a **single source of truth for campaign-level reporting and leadership reviews**.

Columns included in report:

Campaign Name, Brand Name, PSP Name, Campaign Type, Campaign Start Date, Ship By Date, Install By Date, Campaign End Date, Verification Mode, Verification SLA (Hours), Approval Mode, De-installation Proof Required, Total Stores Assigned, Stores Completed, Completion Percentage, Late Shipments, Anomalies Reported, Reorders Raised, Photos Rejected, Reviews Overdue

3.6 Execution & Proof Export (Line-level) Report

Role: Brand Admin / Campaign Admin

Purpose:

This report provides **detailed, line-level visibility into campaign execution and proof submission** at each store, item, and physical location. It enables Brand and Campaign Admins to **verify execution compliance**, review submitted proofs, and track approval status for every placement under a campaign.

Description:

- Provides a **store and location-level breakdown** of campaign execution details.
- Tracks the **execution lifecycle** from not started to completion.
- Captures **installation and submission timestamps** to ensure timelines are met.
- Displays **verification status** of submitted proofs, including approvals, rejections, or waivers.

- Shows **photo requirements vs approvals**, helping assess compliance with proof policies.
- Identifies **who attested to the execution and when**, ensuring accountability.
- Provides access to **photo evidence and media links** for audit, review, and compliance checks.
- Acts as a **detailed audit trail** for campaign execution and verification.

Columns included in report:

Campaign Name, Store Name, Store Number, Item Name, Placement Location, Execution Status, Installed On, Proof Submitted On, Proof Verification Status, Required Photo Count, Approved Photo Count, Waived Photo Count, Attested By, Attested On, Proof Image Link

3.7 Verification & Retakes Export Report

Role: Brand Admin / Campaign Admin

Purpose:

This report enables **Brand Admins and Campaign Managers** to track the **verification, approval, and retake lifecycle of execution proof** submitted by stores. It provides complete visibility into review outcomes, rejection reasons, and retake progress, ensuring campaign quality and compliance.

Description:

- Provides a **detailed view of proof verification activities** across campaigns and stores.
- Tracks the **review status** of submitted photos (pending, approved, or rejected).
- Captures **rejection reasons and reviewer comments** to support transparency and corrective action.
- Identifies **who reviewed the proof and when**, ensuring accountability in the review process.
- Links rejected proofs to **retake tasks**, enabling follow-up and completion tracking.
- Displays the current status and due dates for retakes, enabling the management of SLAs and campaign timelines.
- Acts as an **audit trail for proof verification and quality control**.

Columns included in the report:

- Store Name, Campaign Name, Submission Date, Verification Status, Retake Required, Retake Submission Date, Rejection Reason, Reviewer Name, Comments / Feedback

3.8 Survey Response Export Report

Role: Brand Admin / Campaign Manager

Purpose:

This report provides **Brand Admins and Campaign Managers** with visibility into **survey responses submitted as part of a campaign**, including system-computed values and any manual overrides that have been applied. It ensures transparency, auditability, and control over survey data used for reporting and decision-making.

Description:

- Captures **final survey response values** used for reporting and analysis.
- Distinguishes between **system-computed values** and **manually overridden values**.
- Indicates whether a user has overridden a response.
- Records **who performed the override and when**, ensuring accountability.
- Stores the **reason for override**, supporting audit and compliance requirements.
- Helps Brand teams **validate survey outcomes**, correct anomalies, and maintain data integrity.
- Acts as an **audit trail for survey data adjustments**.

Columns included in report:

Store Name, Campaign Name, Survey Name, Submission Date, Final Response Value, Computed Value, Overridden (Yes/No), Override Value, Overridden By, Override Date & Time, Override Reason

3.9 Exception Queue Export Report

Role: Regional Manager

Purpose:

This report enables **Regional Admins** to quickly identify and manage **stores that require attention due to exceptions** in campaign execution or compliance. It helps prioritize actions, monitor overdue items, and ensure the timely resolution of issues across assigned regions.

Description:

- Provides a **filtered, actionable list of stores with open exceptions**
- Highlights the **type of exception** (overdue tasks, missing proof, rejected submissions, de-installation delays, or anomalies)
- Indicates **severity levels** to help Regional Admins prioritize critical issues
- Tracks **due dates and days overdue** to monitor SLA breaches
- Shows **assigned Regional Admin or reviewer**, ensuring clear ownership
- Displays the **most recent action taken and its timestamp** for context and follow-up
- Acts as a **working queue** for day-to-day exception management and resolution

Columns included in the report:

Store Name, Store Number, Campaign Name, Exception Type, Severity, Due Date, Days Overdue, Assigned Regional Admin, Last Action Taken, Last Action Date & Time

3.10 Review Queue Export Report

Role: Regional Manager

Purpose:

This report enables **Regional Admins** to manage and process **execution proof reviews within their assigned region**. It provides a focused view of pending and completed reviews, helping ensure timely approvals, rejections, and follow-up retakes in line with campaign SLAs.

Description:

- Provides a **region-scoped review queue** containing proof submissions requiring review
- Tracks the **review status** of each proof (pending, approved, or rejected)
- Captures **rejection reasons and reviewer comments** to support clear feedback and corrective action
- Identifies **who reviewed the proof and when**, ensuring accountability
- Links rejected proofs to **retake tasks**, enabling follow-up and closure tracking
- Displays **retake status and due dates** to help manage SLA compliance
- Acts as an **operational work queue** for Regional Admin review activities

Columns included in report:

Store Name, Campaign Name, Submission Date, Review Status, Rejection Reason, Reviewer Name, Review Date & Time, Retake Required (Yes/No), Retake Status, Retake Due Date

3.11 Issue Reporting

Role: Store user

Purpose:

This feature enables **store users** to report issues encountered during kit receipt or installation, such as missing or damaged items. It ensures that stores can raise issues with supporting evidence, allowing for the prompt initiation of corrective actions (such as reorders or replacements).

Description:

- Enables stores to **report issues against received items** directly in the system.
- Captures the **type of issue** (missing or damaged) for proper categorization.
- Records the **quantity affected** to accurately represent the issue.
- Allows **photo uploads as evidence** to support validation and resolution.
- Provides an **optional notes field** for additional context.
- Acts as an **input-only interaction**, with no export available for store users.

Columns included in report:

Store Name, Campaign Name, Item Name, Issue Type, Quantity Affected, Evidence
Photos, Notes
