
NewPOPSys Software Requirements Specification

Table of Contents

Document Info	
Version	1.0
Status	In Development
Last Updated	2026-01-01
Total Files	77 files across 14 sections

Document Structure Overview

This SRS is organized into logical sections covering all aspects of the NewPOPSys platform, from high-level architecture to detailed screen specifications for each user module.

00_Meta

Project documentation, tracking, and cross-reference materials

File	Description
SRS_MASTER_PLAN.md	Overall SRS development strategy and roadmap
AGENT_MEMORY_LOG.md	AI agent session logs and decision history
PROGRESS_TRACKER.md	Development progress and completion status
SOURCE_MAPPING.md	Mapping between source documents and SRS sections
GAP_REPORT.md	Analysis of gaps and missing requirements
TABLE_OF_CONTENTS.md	This document

Section Total: 6 files

01_Introduction

Purpose, scope, and foundational context for the SRS

File	Description
1.1_Purpose.md	Document purpose and intended audience
1.2_Scope.md	System boundaries and scope definition
1.3_Definitions_Acronyms.md	Glossary of terms, abbreviations, and acronyms

1.4 References.md	Referenced documents and standards
1.5 Document Overview.md	Guide to navigating this SRS

Section Total: 5 files

02_Overall_Description

Product perspective, features, and operating environment

File	Description
2.1 Product Perspective.md	System context and relationship to other systems
2.2 Product Features.md	High-level feature summary
2.3 User Classes.md	User types and their characteristics
2.4 Operating Environment.md	Technical environment and infrastructure
2.5 Design Constraints.md	Limitations and design boundaries
2.6 Assumptions Dependencies.md	Assumptions made and external dependencies
diagrams/system_context.mmd	System context diagram (Mermaid)

Section Total: 7 files

03_System_Architecture

Technical architecture, database design, and integration patterns

File	Description
3.1 Database Model.md	Database schema and entity relationships
3.2 Component Architecture.md	System component breakdown and interactions
3.3 Deployment Architecture.md	Infrastructure and deployment topology
3.4 Integration Architecture.md	External system integrations and APIs
diagrams/erd_core.mmd	Core entity relationship diagram
diagrams/erd_orders.mmd	Orders entity relationship diagram
diagrams/component_overview.mmd	Component architecture diagram
diagrams/deployment.mmd	Deployment architecture diagram

Section Total: 8 files

04_User_Personas_RBAC

User personas, roles, permissions, and authentication

File	Description
4.1 Persona Matrix.md	Overview matrix of all user personas
4.2 Permission Matrix.md	Role-based access control matrix
4.3 Authentication Flows.md	Login, SSO, and authentication workflows

Individual Persona Specifications

File	Description
personas/P01_Store_Associate.md	Store Associate persona definition
personas/P02_Store_Manager.md	Store Manager persona definition
personas/P03_District_Manager.md	District Manager persona definition
personas/P04_Regional_Manager.md	Regional Manager persona definition
personas/P05_Brand_Admin.md	Brand Administrator persona definition
personas/P06_PSP_Operator.md	PSP Operator persona definition
personas/P07_PSP_Manager.md	PSP Manager persona definition
personas/P08_Platform_Admin.md	Platform Administrator persona definition
personas/P09_API_Consumer.md	API Consumer/Integration persona definition

Section Total: 12 files

05_Module_SharedFoundations

Shared screens and components used across all modules

File	Description
screens/L001_Universal_Login.md	Universal login and authentication screen

Section Total: 1 file

06_Module_MobilePWA

Mobile Progressive Web App for field staff

File	Description
screens/M001_Dashboard.md	Mobile dashboard and home screen
screens/M002_Survey_List.md	Survey list and filtering

screens/M003_Survey_Capture.md	Survey data capture workflow
screens/M004_Photo_Capture.md	Photo capture with annotations
screens/M005_Offline_Queue.md	Offline data queue management
screens/M006_Installation_Checklist.md	Installation verification checklist
screens/M007_Store_Profile.md	Store profile and information
screens/M008_Notifications.md	Push notifications and alerts

Section Total: 8 files

07_Module_BrandAdmin

Brand administration portal for corporate users

File	Description
screens/B001_Dashboard.md	Brand admin dashboard and KPIs
screens/B002_Campaign_Manager.md	Campaign creation and management
screens/B003_Store_Directory.md	Store directory and management
screens/B004_Analytics.md	Analytics and reporting dashboard
screens/B005_Asset_Library.md	Digital asset management
screens/B006_User_Management.md	Brand user administration
screens/B007_Settings.md	Brand configuration settings

Section Total: 7 files

08_Module_PSPOperations

Print Service Provider operations portal

File	Description
screens/P001_Production_Queue.md	Production job queue and management
screens/P002_Job_Details.md	Individual job details and workflow
screens/P003_Shipping_Integration.md	Shipping label and tracking integration

Section Total: 3 files

09_Module_StorePortal

Store-level portal for managers and staff

File	Description
screens/S001_Dashboard.md	Store dashboard and status overview
screens/S002_Order_History.md	Order history and tracking
screens/S003_Survey_Review.md	Survey submission review
screens/S004_Installation_Status.md	Installation progress tracking
screens/S005_Support_Tickets.md	Support ticket submission and tracking

Section Total: 5 files

10_Module_PlatformAdmin

Platform administration for system operators

File	Description
screens/A001_System_Dashboard.md	System health and monitoring dashboard
screens/A002_Tenant_Management.md	Multi-tenant brand management
screens/A003_PSP_Network.md	PSP network administration
screens/A004_Global_Settings.md	Platform-wide configuration
screens/A005_Audit_Logs.md	System audit trail and logs
screens/A006_Integration_Hub.md	Third-party integration management

Section Total: 6 files

11_API_Specifications

RESTful API documentation and specifications

File	Description
11.1_API_Overview.md	API design principles and conventions
11.2_Authentication_API.md	Authentication and authorization endpoints
11.3_Core_Endpoints.md	Core business logic API endpoints
11.4_Webhook_Events.md	Webhook event definitions and payloads

Section Total: 4 files

12_Non_Functional_Requirements

Performance, security, and quality attributes

File	Description
12.1 Performance.md	Performance benchmarks and requirements
12.2 Security.md	Security requirements and controls
12.3 Reliability.md	Availability and disaster recovery
12.4 Scalability.md	Scalability and capacity planning
12.5 Usability.md	Usability and accessibility standards
12.6 Compliance.md	Regulatory and compliance requirements

Section Total: 6 files

99_Appendices

Supporting materials and reference documentation

File	Description
Appendix A Glossary.md	Extended glossary of terms
Appendix B Data Dictionary.md	Complete data element definitions
Appendix C UI Standards.md	UI/UX design standards and patterns
Appendix D Error Codes.md	System error codes and handling
Appendix E Change Log.md	Document revision history

Section Total: 5 files

Summary

Section	Files	Status
00_Meta	6	In Progress
01_Introduction	5	Complete
02_Overall_Description	7	Complete
03_System_Architecture	8	Complete
04_User_Personas_RBAC	12	Complete
05_Module_SharedFoundations	1	Complete
06_Module_MobilePWA	8	Complete
07_Module_BrandAdmin	7	Complete
08_Module_PSPOperations	3	Complete

09_Module_StorePortal	5	Complete
10_Module_PlatformAdmin	6	Complete
11_API_Specifications	4	Complete
12_Non_Functional_Requirements	6	Complete
99_Appendices	5	Complete
TOTAL	83	

Navigation Guide

- **New to the project?** Start with [1.1 Purpose.md](#) and [1.5 Document Overview.md](#)
- **Understanding users?** See [4.1 Persona Matrix.md](#)
- **Technical architecture?** Begin with [3.2 Component Architecture.md](#)
- **Screen specifications?** Navigate to the relevant module section (05-10)
- **API integration?** See [11.1 API Overview.md](#)
